	Examiner Raeann Gorden	Art Unit 3711	

-- **Th MAILING DATE of this communication appears on the cover sheet with the correspondence address --**
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 8, 10, 11, and 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Melvin et al (4,141,559) in view of Hotchkiss. Regarding claims 1-5, Melvin discloses a golf ball comprising a core and cover. Melvin discloses dimples but does not disclose the pattern claimed by applicant. Hotchkiss teaches a dimple pattern comprising eleven different sets of dimples. Regarding claim 6, Melvin discloses a dimple diameter of 0.160 inch. Regarding claim 8, Melvin discloses a polybutadiene core and ionomeric cover. Regarding claim 10, the cover thickness is 0.0825 inch. Regarding claims 11 and 13-15, Melvin discloses a golf ball comprising a core and cover. Melvin discloses dimples but does not disclose the pattern claimed by applicant. Hotchkiss teaches a dimple pattern comprising eleven different sets of dimples. The core has a diameter of 1.515 inches. One of ordinary skill in the art would have modified the dimple pattern for enhanced flight performance.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11, 1-16, 1-9, and 1-8 of U.S. Patent No. 6,814,677, 6,652,341, 6,602,153, and 6,464,601. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present invention and the patents list above each claim golf balls comprising eleven different sets of dimples. The golf balls also have a lift coefficient greater than 0.19 at a Reynolds number of 70,000 and 2000 rpm and a drag coefficient less than 0.230 at a Reynolds number of 180,000 and 3000 rpm.
